Clinical Educator

[REDACTED]

Dear Chris [REDACTED]:

This letter is to praise the Micro-Z/Garment unit that I received from Advanced Therapy Solutions on April 26,2011.

Prior to the Micro-Z unit, my feet felt numb to touch, but always hurting. My feet felt like they were in an ice-packed vice from the mid-calf to my toes. I had the pain for over 10 years. It felt like I walking on stones. In the beginning 10 years ago, the feet pain was on again, off again. For the past few years the feet pain never ceased. Warm weather or warm water would make it worse. I would wake throughout the night with the severity of the feet pain spiking, only for me to take another pain pill. The pain in my feet was so bad that I could not walk one block or sleep more than a couple of hours at a time. Pain is very distracting and depressing. Prescription pain pills could only dull some of the pain and for very short periods of time. I could not focus on conversations or instructions.

From the very first night of wearing the Micro-Z unit, my feet pain was gone. My pain went from a 10 to 0. The Micro-Z unit has eliminated my feet pain I still have numbness to touch, but NO Pain. I wear the unit for 8 hours at night while I sleep, as directed. During the first month of usage, I experienced pain only twice during the day while not wearing the unit, but the pain was at a level 5 and lasted only for short period of time (less than one-half hour).

I am able to participate in life without the burning feet pain distraction. I can give my full attention to doctors, family and friends when they are speaking to me. I can sleep through the night. I can wake without bursting into tears from the *feet* pain. I can walk better. I cannot praise the unit enough, and I cannot emphasize the results of the feet pain relief enough.

I do wish you had a similar unit that would work for my back pain. Then my life would be almost perfect. Thank you.

Sincerely,

Richard [REDACTED]
